2023 PSI PREMIER AWARDS WINNER

14 Times Winners
PSI DISTRIBUTOR OF THE YEAR

ADI
a resideo company

HELPING SECURITY PROFESSIONALS PROTECT AND SECURE HOMES AND BUSINESSES AS THE NIGHTS BECOME LONGER AND COLDER.

The winter and dark nights raise additional requirements for residential and commercial properties, whether adding intruder protection, utilising video surveillance in low-lighting areas or home comfort and security. With a product range that includes home flood light protection, video cameras for all lighting and weather conditions and smart home products to reduce costs and deter intruders, ADI's great quality products from leading brands are available whether you shop online, in branch or would rather call our experienced sales professionals to discuss your requirements.

"Product choice is one part of what makes ADI a leading distributor with products across security, fire and AV. ADI offers leading brands and product solutions that installers need for their projects. Our dark nights product selection showcases the products available to support customers throughout the winter months."

Simon Allan, ADI UK and Ireland Country Leader

extraLUX cameras

Clear and coloured images without IR LED or light pollution

The X series extraLUX cameras achieve optimal performance in low-light conditions by producing crystal-clear and true-colour images without IR LEDs, regardless of the environment or time of day. The extraLUX series (XNO-6085R, XND/XNV-6085(V)) feature an outstanding F0.94 lens with a 1/2" CMOS sensor, capturing vivid colour images even in low-light environments.

Range of IR Illuminators

Where there are installation constraints that require the camera to be distant from the actual scene, built-in IR might not be enough. External IR illuminators can complement the setup and enable video surveillance in the dark without causing light pollution.

Reduction in false alarms caused by headlights from vehicles

Deep learning AI cameras offer a far superior performance in the dark compared to more traditional algorithms based on motion. AI cameras significantly reduce false alarms associated with video noise such as light reflections from headlights, as well as accurately classify vehicles, people and faces.

Standard Object Detection

AI–based Object Detection

Enhanced AI-based Noise Reduction and Preferred Shutter Control

AI plays a vital role in providing high image quality in darkness. WiseNRII is a new camera enhancement that uses AI to intelligently identify movement and reduce blur in noisy, low light environments. AI-based Preferred Shutter technology automatically adjusts the shutter speed based on classified objects in motion and the lighting conditions in a scene to reduce motion blur. This delivers clear images.

- SPRAY PAINTING SERVICES

Video Surveillance Solutions in Wintery Conditions

Installing and maintaining video camera systems throughout winter comes with additional challenges posed by cold weather, snow and low-light to ensure they function optimally. ADI's vast product assortment from leading brands ensures installers have the correct products for the environment they operate in, here we look at specific camera requirements to be considered:

Weatherproofing - To withstand cold temperatures and harsh weather conditions, look for cameras with an IP67 or IP68 rating - the higher the IP rating the more extreme conditions the camera can withstand. Cable connections should also be weatherproofed by using suitable junction boxes.

Low-Light Performance - With longer and darker nights cameras need to function in low-light conditions to maintain nighttime surveillance. Select cameras with infrared (IR) capabilities, IR cameras can capture quality images in complete darkness. Some cameras also now come with additional warm or white light modes which activate only when a subject is in view, this reduces the need for other supplementary light and reduces light pollution.

Resolution and Quality - Opt for high-resolution cameras to capture clear and detailed imagery, even in snowy or dark conditions. Full HD (1080p) or even 4K or Ultra High Definition (UHD) cameras 3840x2160 pixels.

Thermal Imaging - Consider incorporating thermal imaging cameras into your surveillance system. These cameras can detect heat signatures, making it easier to spot intruders or wildlife in the dark or during snowfall and extreme weather.

Remote Access – Cloud connectivity and remote monitoring enables customers to monitor live and access recorded footage from a smartphone or computer, so monitoring can be done away from site.

Installation and Maintenance – When installing cameras positioning is all important, winter throws in more positioning considerations. Installers should avoid potential obstructions due to snowfall and angle to avoid glare from reflective surfaces like snow and ice. Maintenance is especially important during winter to ensure components are working correctly and not hindered by the elements.

Power and Back Up Power – Ensure your power supply is reliable as extreme cold can affect battery performance. Install back up power sources to ensure your video system continues to operate during power outages which can be more common in winter.

Conclusion - By addressing these considerations installers can ensure their customers are installing the correct video surveillance system for the environment and it remains effective and reliable throughout the winter season, helping to enhance security and surveillance for residential and commercial premises or public spaces.

TOSHIBA

Purpose-built storage solutions for surveillance systems

Surveillance Hard Drives

With up to 10 TB of storage capacity and support for up to 64 video cameras, the S300 Pro ensures mission-critical surveillance records continually. The S300 is optimized for the requirements of surveillance systems for small and medium-sized businesses (SMBs) with up to 64 high-resolution camera streams.

Use for

- Surveillance Digital Video Recorders (sDVR)
- Surveillance Network Video Recorders (sNVR)
- Hybrid sDVR (analog and IP)
- RAID Storage Arrays for Surveillance (only S300 Pro and S300 4 TB HDWT140UZSVA)

S300 Pro & S300

Top Features

- 3.5“ SATA Hard Drive
- 24/7 operation
- Up to 180 TB/year

S300 Pro:

- 10 | 8 | 6 TB
- 7,200 rpm
- 256 MB buffer
- Supports up to 64 video cameras

S300:

- 6 | 4 | 2 | 1 TB
- 5,400 rpm (6 | 4 | 2 TB) | 5,700 rpm (1 TB)
- 256 MB buffer (6 | 4 TB) | 128 MB buffer (4 | 2 TB) | 64 MB buffer (1 TB)
- Supports up to 64 video cameras

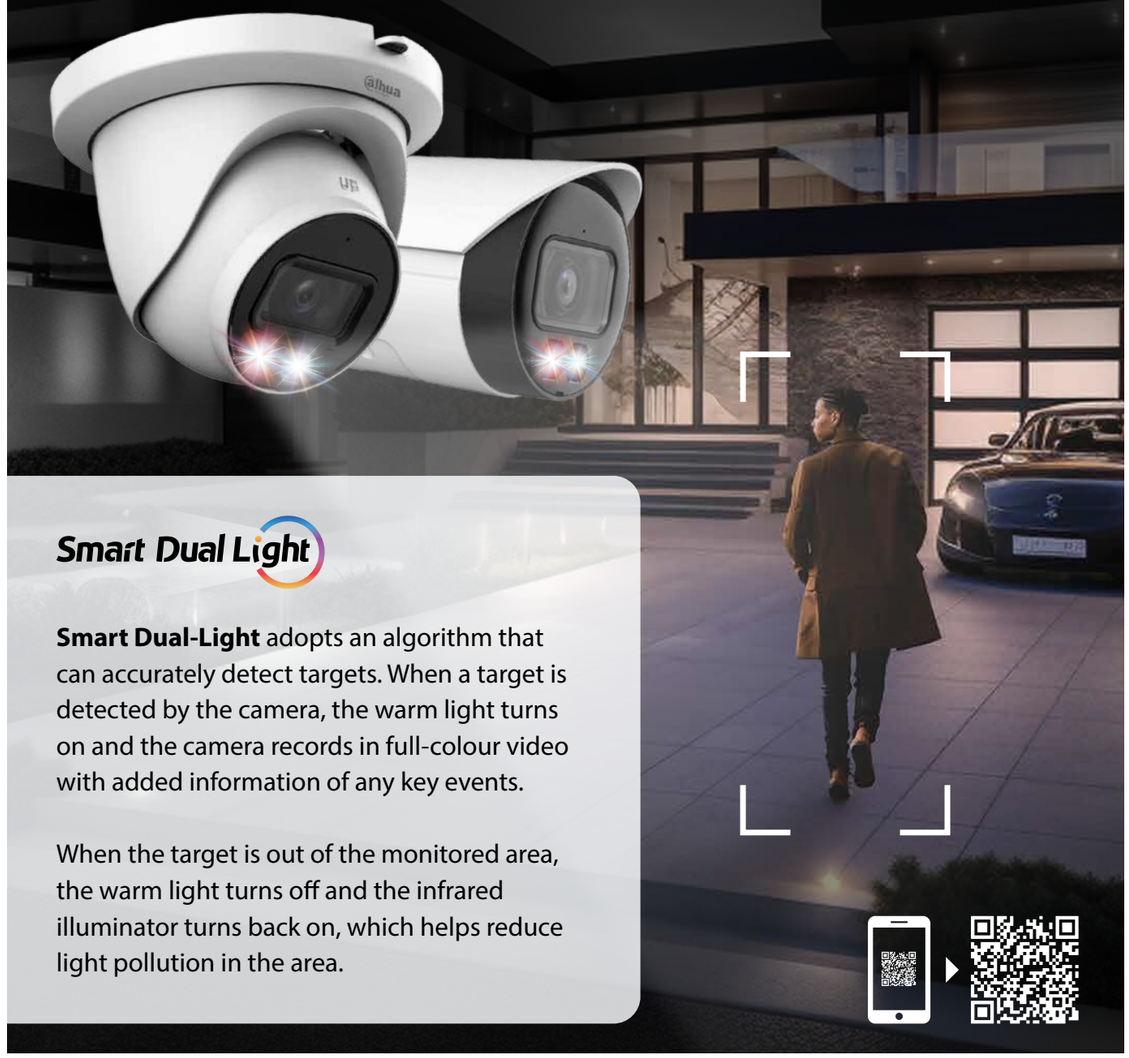
- Connects to standard network
- Simple installation with PoE

Smart Dual-Light Technology



Smart Dual Light

Smart Dual-Light adopts an algorithm that can accurately detect targets. When a target is detected by the camera, the warm light turns on and the camera records in full-colour video with added information of any key events.

When the target is out of the monitored area, the warm light turns off and the infrared illuminator turns back on, which helps reduce light pollution in the area.

Enhancing Residential Security and Comfort During Darker Nights

As daylight hours grow shorter and the winter chill sets in, residents and homeowners face a host of challenges. These include managing energy costs, navigating low-light entry and ensuring their homes remain secure against potential intruders. With these concerns in mind, ADI looks at how products for residential security and home automation can offer protection and comfort to the end-user as the nights get longer.

Maintaining Home Security Systems
According to ADT's 2022 burglary report 58% of break-ins happen between 6pm-6am, with 70% occurring on weekdays. This underscores the importance of well-maintained and clearly visible security alarm systems as effective deterrent. The recommendation for domestic homes is for a BSI EN 50131 Grade 1 or 2 system, wired or wireless. Installers can offer subscription monitoring services and maintenance contracts, or homeowners can choose to self-monitor via mobile apps. Systems vary greatly from bell only alarms to comprehensive smart security systems, accommodating various customer budgets and needs. For added protection during the winter months customers should consider weatherproof outdoor CCTV cameras designed to function in low-light conditions to deter intruders and monitor the home.

Fire Safety in Winter - Winter months bring unique fire hazards, often overlooked by homeowners. With heating systems in full swing and increased use of lights and plugs, it's crucial to have high-quality smoke alarms. With more choice installers are now able to offer wired, wireless and smart detectors that send alerts via an app for early fire detection. Additionally, investment in carbon monoxide detectors can monitor emissions from gas heating systems. Though there is no legislation to cover domestic homes, the common areas of flats and maisonettes are covered in England and Wales by The Regulatory Reform (Fire Safety) Order 2005 with requirements which may include, detectors, alarms, emergency lighting and extinguishers.

Home Automation for Comfort and Security - Convenience is key when offering smart solutions, especially in the winter when energy bills are at their highest and the longer nights can lead to more fear about intruders. Good lighting in the winter can make a significant difference, whether for deterring intruders or helping residents feel safe when entering their property. Outdoor smart lighting is a great solution with motion activated lights to help protect properties and alert others to activity. Within the home there are options to use smart plugs and automated lights to simulate presence in the property which in turn can deter burglars. To save on energy costs, consider offering smart thermostats, and for added protection against cold weather-induced pipe bursts, explore the options in water leak and flood detection devices.

Access Control for Dark Environments
While access control in flats and apartment blocks is commonplace, residential customers are increasingly seeking advanced lock solutions to enhance their security. Smart locks, operable via a smartphone app even in freezing temperatures, offer control over who enters the property. Alternatively, keyless entry options with biometric or PIN access eliminate the need for physical keys susceptible to cold-related issues. For added convenience and security, automated access control solutions for gates, allowing people to stay warm in the vehicle as they enter. From an intruder perspective, video doorbells can allow you to see who's visiting before answering the door and are especially effective when combined with outdoor lighting.

Conclusion
As residential customers look to secure and protect their homes throughout winter there are opportunities for installers to both sell add on smart home products to add comfort or cost efficiency or full security solutions with monthly service and maintenance controls to ensure longer term customer loyalty.

ring

Shine a light on darker nights

By your side. At your command.

Ring Floodlight Cam Wired Pro

8SF1E1-WEU0 - white
8SF1E1-BEU0 - black

Features 1080p Video with HDR, powerful LED beams and a security siren, so you'll see what's happening more clearly, day or night. 3D Motion Detection and Bird's Eye View allow you to pinpoint when and where a motion event begins with an aerial map view.

Ring Floodlight Cam Wired Plus

8SF1P1-WEU0 - white
8SF1P1-BEU0 - black

Floodlight Cam Wired Plus is hardwired for reliable outdoor protection and features 1080p HD Video, Two-Way Talk, Customisable Motion Zones, a remote-activated security siren and 2000 lumen LED floodlights for extra visibility after dark and protection when you need it most.

Ring Spotlight Cam Pro Wired

Our most advanced hardwired spotlight camera includes 3D Motion Detection, Audio+, and full HDR video to help provide pro-level security for your outdoor spaces.

* plug-in and battery powered also available

8SC1S9-WEU3 - white
8SC1S9-BEU3- black

Ring Spotlight Cam Plus Wired

Spotlight Cam Plus is your go-to protection for any out-of-sight area thanks to Colour Night Vision, customisable Motion Detection, and a pair of bright, motion-activated lights.

* plug-in and battery powered also available

B0BBPKD4FX - white
B0BBP1MBPP - black

ring

Protect your whole home

With Ring Home Security

Indoor Cam

Get the whole picture about what's happening inside your home, or keep the picture private by using the manual, removable Privacy Cover to turn off audio and video with a simple swivel. Versatile protection and personalised peace of mind - that's Indoor Camera (2nd Gen). The ideal way to check in on your home from wherever you are, Indoor Camera (2nd Gen) is a versatile plug-in Security Camera, designed to go almost anywhere indoors.

B0B6GKH3C2 - white
B0B6GKZHYS - black

- 1080p HD Video & Color Night Vision
- Motion Alerts
- Two-Way-Talk
- Manual Audio & Video Privacy Cover
- Plug-In Power
- Easy Installation

Chime

Hear notifications in your home when someone presses your doorbell or when motion is detected. Plug into standard wall sockets and connect Ring Chime to all your Ring Doorbells and Cameras.

8AC1SZ-0EU0

Chime Pro

8AC1PZ-0EU0

Ring Video Doorbell Wired

Slim and reliable hardwired Video Doorbell with 1080p HD Video, Live View and Two-Way Talk.

8VRAGZ-0EU0

Ring Video Doorbell Pro 2

Ring Video Doorbell Pro 2 Hardwired features 1536p HD Head to Toe Video, Two-Way Talk, 3D Motion Detection, Bird's Eye View, enhanced dual-band wifi, and Customisable Privacy Settings. Professional installation recommended.

8VRCPZ-0EU0

Battery Video Doorbell Plus

Answer the door from anywhere with Battery Video Doorbell Plus, a wireless doorbell security camera that features 1536p HD Video and Head-To-Toe View, so you won't miss a visitor or package delivery.

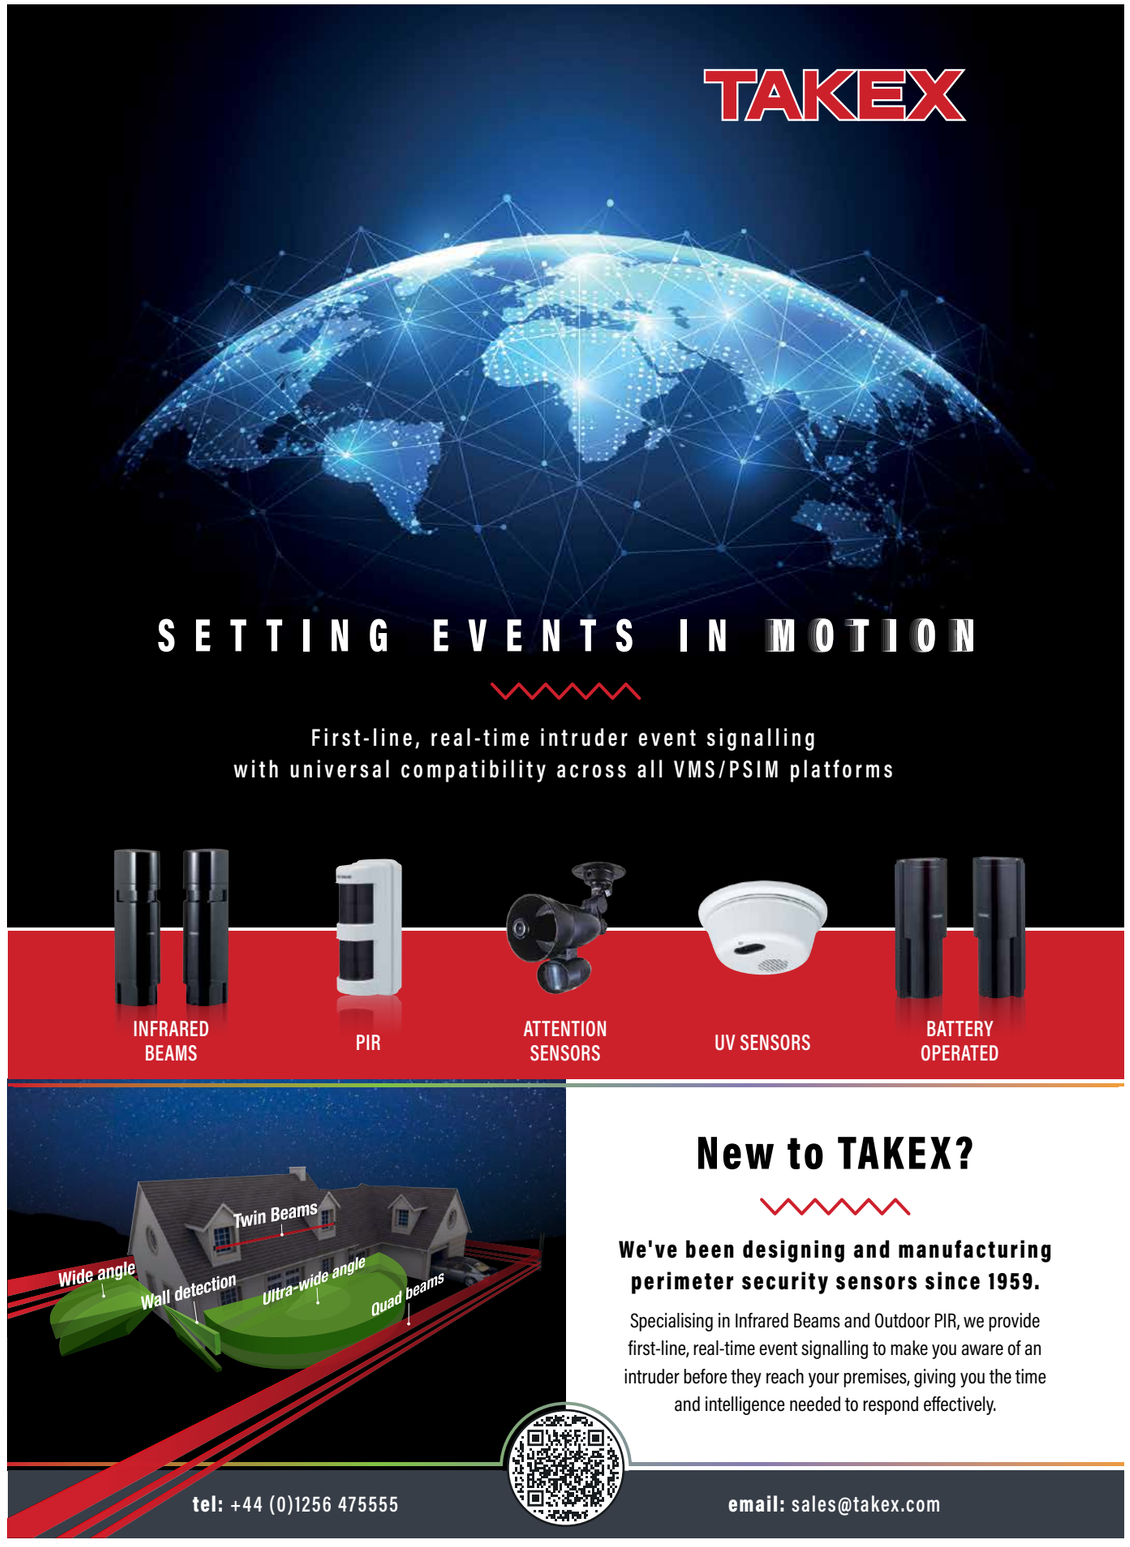
TAKEX



MS-12FE

Dual Zone Outdoor PIR

- Dual-zone detection system
- 2-12m coverage
- Rotating sensor heads (±90° horizontal adjustment)
- Selectable NO/NC relay output
- IP54 housing

OMS-12FE

Dual Zone Outdoor PIR

- Dual-zone detection system
- 3-12m coverage
- Fixed sensor heads
- Supplied masking sheets allow precise area control
- IP54 housing

PB-30TK

Photoelectric Beam Sensor

- 2 x Synchronised high power beams
- Double modulation for unsurpassed light immunity
- Auto-gain control (AGC)
- 50,000 lux sunlight immunity
- IP55 housing

PB-IN-200HFA

Quad Photoelectric Beam Sensor

- 4 x Synchronised high power beams
- 4 x Selectable beam channels to prevent crosstalk
- Environmental monitoring circuit
- 50,000 lux sunlight immunity
- IP55 housing

PIR-T40NAM

Intelligent PIR Curtain Detector

- 4 Selectable operation modes
- 2m to 6m installation height
- High-performance triple mirror optical system
- Anti-masking function
- IP55 housing

PR-11BE

Reflective Photoelectric Beam Sensor

- Easy installation
- Suitable for indoor and outdoor use
- Monitor jack for alignment with multi-meter
- Beam direction can be rotated a full 180°
- Response time adjustment

TX-114FR

Single Sided Transmitter Tower

- Dual-zone detection system
- 2-12m coverage
- Rotating sensor heads (±90° horizontal adjustment)
- Battery powered

TXF-20TDM

Battery Operated Twin Beam

- 2x Synchronised high power beams
- Double modulation for increased light immunity
- 4 Selectable beam channels to prevent crosstalk
- Up to 3 years battery life

TXF-125DM

Battery Operated Quad Beam

- 4 x Synchronised high power beams
- Four selectable operation ranges 25/50/75/100m
- 4 x Selectable beam channels to prevent crosstalk

NP7-12

Industrial NP Series 17Ah Valve Regulated Lead Acid Battery

- Lead Acid battery chemistry delivers energy to the multipurpose through an easily controlled reaction
- 12 V DC battery - Powers your multipurpose safely
- Lead Calcium Grids for superior life

CR2

3V 1Ah Lithium Battery, Non-Rechargeable

- Professional specification for industrial & consumer applications
- Premium long-life product
- High capacity

NP17-12

Industrial NP Series, 17Ah Valve Regulated Lead Acid Battery

- Can be used multiple times, hence saving your money
- Lead Acid battery chemistry delivers energy to the multipurpose through an easily controlled reaction
- 12 V DC battery - Powers your multipurpose safely

NP1.2-12

Industrial NP Series, 1.2Ah Valve Regulated Lead Acid Battery

- Yuasa batteries deliver premium quality at low total cost of ownership
- Sealed Lead Acid, AGM construction to provide safe, oustanding power to your devices
- EUROBAT Classification: 3 to 5 years 'Standard Commercial'

NP3.2-12

ndustrial NP Series, 3.2Ah Valve Regulated Lead Acid Battery

- Rechargeable battery - Lasts longer on a single charge than its disposable counterparts
- Lead Acid battery chemistry delivers energy to the multipurpose through an easily controlled reaction
- 12 V DC battery - Powers your multipurpose safely

NP12-12

Industrial NP Series, 12Ah Valve Regulated Lead Acid Battery

- Can be used multiple times, hence saving your money
- Lead Acid battery chemistry delivers energy to the multipurpose through an easily controlled reaction
- 12 V DC battery - Powers your multipurpose safely

Glow Guide Technology with Euro Stopper

Safety Technology's Euro Stopper® is now available with an embedded unique substance that glows in the dark. The Glow Guide pigment will release light for up to 8 hours in darkness or dimly lit areas and charges up after only 30 minutes exposure to natural or artificial light. It is essential for use in emergency situations.

The polycarbonate call point protector is now supplied in a kit form, allowing the user to assemble the product in the way which best suits their application, with the choice of red or green housing shell, language, mounting option, sounder and break seal facility.

STI-15C10ML

Euro Stopper Surface Mount

- Cover helps protect against vandalism and damage
- Surface Mount (32mm spacer)
- No Sounder
- Multi Lingual Language labels supplied

STI-15C20ML

Euro Stopper Surface Mount with Sounder

- Cover helps protect against vandalism and damage
- Surface Mount (32mm spacer)
- With Sounder
- Multi Lingual Language labels supplied

STI-15D10ML

Euro Stopper Surface Mount

- Cover helps protect against vandalism and damage
- Surface Mount (50mm spacer)
- No Sounder
- Multi Lingual Language labels supplied

STI-15D20ML

Euro Stopper Surface Mount with Sounder

- Cover helps protect against vandalism and damage
- Surface Mount (50mm spacer)
- With Sounder
- Multi Lingual Language labels supplied

STI-15010ML

Euro Stopper Flush Mount

- Cover helps protect against vandalism and damage
- Flush Mount
- Non Sounder
- Glow Guide
- Multi Lingual Language labels supplied
