# Create World Class Installations with ADI

Hospitality and leisure facilities often welcome high volumes of visitors, making operational efficiency essential while maintaining an exceptional guest experience.

With the introduction of Martyn's Law on the horizon, prioritising the safety of both guests and staff and meeting the associated compliance requirements is becoming a critical responsibility for operators.

At ADI, we deliver an extensive range of advanced solutions across security, access control, fire safety, and professional AV installations. Our product range enables venues to strengthen security measures, streamline operations, and continue providing a high-quality, seamless guest experience.

For installers, our products are readily accessible online, in branch, or through our dedicated sales team, supporting customers across the UK and Ireland with dependable quality and service to ensure you have the right solutions, when and where you need them, enabling you to create safe, compliant and engaging hospitality environments.

# PROTECT GUESTS, STAFF & SERVICE CONTINUITY WHEN IT **MATTERS MOST**

- BS 5839-1:2025 reaffirms the case for protective covers.
- Protect the life-safety devices you rely on, so they're ready when it matters most.

 [www.sti-global.com](http://www.sti-global.com)

 [info@sti-emea.com](mailto:info@sti-emea.com)

 01527 520 999

**STI-15C20ML**

**Euro Stopper Multi Kit, 32mm Surface Mount, Sounder**

- 3 year guarantee against breakage of polycarbonate in normal use
- Tough polycarbonate housing can withstand the severest of knocks
- A simple 4 fixing installation can retrofit over existing device

**STI-13120FR**

**Surface Mount Universal Stopper with Dome Cover**

- Activate, Label Hood with Sounder, 'FIRE' French Label, Red. ADA Compliant
- Protects pull stations, keypads, intercom stations, emergency buttons, electrical light switches, duplex plugs, etc.
- High strength continuous hinge.

**STI-13120EG**

**Surface Mount Universal Stopper with Sounder**

- 'Emergency Exit' Label, Green. ADA Compliant
- Protects pull stations, keypads, intercom stations, emergency buttons, electrical light switches, duplex plugs, etc.
- High strength continuous hinge.

**STI-6400**

**Exit Stopper Multifunction Door Alarm, 5.375" x 5.375" x 2", Red**

- Multifunction alarm, helps prevent unauthorized exits/entries
- Beeps and flashes when activated
- Add warning in second language, includes 21 labels total in different languages

**STI-6200**

**Fire Extinguisher Theft Stopper, Alarm, Red**

- Alarm helps prevent theft and misuse
- Mounts easily next to protected device
- 95/105 dB warning alarm when activated

**STI-9605**

**Steel Web Stopper Surface Mount Guard for Mini Smoke Detectors**

- Silver
- Guard helps protect against vandalism and damage
- 9-gauge coated steel wire
- Surface mount

**G3C409LD-EN**

**Multipurpose Push Button, Turn-To-Reset, IP Camera**

- 'LOCKDOWN' Label, Blue
- 3-in-1 configurable for multipurpose push button; Key-to-Reset, Momentary and Turn-to-Reset.
- Versatile mounting plate

**STI-15C10CB**

**Euro Stopper, 32mm Surface Mount, No Sounder, Custom Label**

- Non-Returnable, Blue
- Prevents malicious or accidental activation
- Clear, tamper-proof polycarbonate cover
- UV-stabilised for durability

**STI-13110CB**

**Universal Stopper Surface Mount with Custom Label, 5.43"x4.56"x 3.98"**

- Protective cover for manual call points and emergency buttons
- Suitable for indoor and outdoor use
- Low profile or dome polycarbonate design

# Hikvision Smart Hotel Solution

Make every stay safe and memorable.  
Streamline hotel operation with **AcuSeek**.

 **Locate the target in seconds...**

 Person wearing a red top and white trousers

### Search **Broadly**

Search everything, from persons, vehicles, animals to signs, plants and beyond

### Search **Instantly**

Just type a word or a sentence, find the targets in seconds

### Search **Accurately**

High-precision search based on Hikvision Guanlan Large-Scale AI Models

### Search **Cross-Platform**

Visual search via NVR webpage, local GUI, HikConnect, Hik-Partner Pro and HikCentral Professional (coming soon)

**DS-7732NXI-I4/16P/VPro**

**DS-2CD2346G3D-I2ZUY/SL(2.8/4mm)**  
311332181

- 2 independent channels, 1 wiring, 1 IP
- 2.8/4 mm in one camera, point vari-focal
- Innovative interpolated design, highly waterproof and user-friendly
- Excellent low illumination performance via Powered by DarkFighter
- Active strobe light and audio alarm to warn intruders off
- Anti-corrosion design (NEMA 4X), more reliable
- Crystal-clear audio with Arrayed Dual-Mic
- Person and vehicle classification based on deep learning

**DS-2CD2646G2H-I2S2U/SL(2.8-12mm)/eF**  
311331187

- High quality imaging with 4 MP resolution
- Clear imaging against strong back light due to 120 dB WDR technology
- Efficient H.265+ compression technology
- Motorised varifocal lens for easy installation and monitoring
- Focus on human and vehicle classification based on deep learning
- Active strobe light and audio alarm to warn intruders off
- Provide real-time security via built-in two-way audio
- Water and dust resistant (IP67) and vandal resistant (IK10)
- Built-in arrayed dual-microphone for real-time high quality audio security

**DS-2CD2387G3-LIS2UY/SL(2.8mm)**  
311328204

- HikAI-ISP for excellent noise reduction effect
- 24/7 colourful imaging via ColorVu technology
- Scene-adaptive WDR
- Focus on Person and Vehicle classification based on deep learning
- Built-in arrayed dual-microphone for real-time high quality audio security
- Provide real-time security via built-in two-way audio
- Anti-corrosion design, providing reliability and longevity compared to standard (NEMA4X)
- Smart Hybrid Light: Integrates IR and White lights, 3 supplemental lighting modes
- Water and dust resistant (IP67)
- Audio and alarm interface available
- Active strobe light and audio alarm to warn intruders off

**DS-2CD2747G2H-LIPTRZS2U/SL(2.8-12mm)**  
311327030

- Motorized Pan, Tilt, Rotate, Zoom for easy installation and monitoring
- 24/7 colorful imaging via ColorVu technology
- IR light & White light & Smart Hybrid Light modes
- Clear imaging against strong back light due to 130 dB WDR technology
- Human and vehicle classification based on deep learning
- Built-in arrayed dual-microphone for real-time high quality audio security
- Active strobe light and audio alarm to warn intruders off
- Water and dust resistant (IP66) and vandal resistant (IK10)
- Audio and alarm interface available

**DS-2CD2087G3-LI2UY/SL(2.8mm)**  
311328174

- HikAI-ISP for excellent noise reduction effect
- 24/7 colourful imaging via ColorVu technology
- Scene-adaptive WDR
- Focus on Person and Vehicle classification based on deep learning
- Built-in arrayed dual-microphone for real-time high quality audio security
- Provide real-time security via built-in two-way audio
- Anti-corrosion design, providing reliability and longevity compared to standard (NEMA4X)
- Smart Hybrid Light: Integrates IR and White lights, 3 supplemental lighting modes
- Water and dust resistant (IP67)
- Active strobe light and audio alarm to warn intruders off

# Comprehensive Fire Safety Solutions for the Hospitality Sector

## Designed to ensure safe evacuation and operational continuity

Fire safety is a critical concern for hospitality environments such as hotels, restaurants, leisure centres, and event venues. These settings often involve high occupancy, 24/7 operation, and varied spaces/rooms from guest rooms and kitchens to lobbies and conference areas. ADI provides advanced, fully integrated fire protection solutions that help hospitality businesses protect guests, staff, and property while maintaining compliance and ensuring uninterrupted service.

### Smart Detection, Alert, and Evacuation Systems

Every second counts in a fire emergency, especially in hospitality spaces where rapid evacuation is vital. ADI offers intelligent [fire detection systems](#) utilising state-of-the-art sensors and addressable control panels, which provide early, accurate warnings with minimal risk of false alarms. These solutions are adaptable to a wide range of environments, from individual guest rooms to large public areas.

To ensure effective communication during emergencies, ADI systems incorporate reliable [notification appliances](#), including sounders, strobes, and [voice alarms](#). Integrated [public address and voice evacuation systems](#) deliver clear, location-specific instructions to guide occupants safely and calmly to exits. [Emergency lighting and illuminated signage](#) ensure visibility and direction, even in power outages or smoke-filled conditions, supporting a safe and orderly evacuation.

### Regulation-Compliant and Scalable for Complex Sites

Fire protection systems offered through ADI are fully compliant with current fire safety legislation and hospitality-specific building codes. Ideal for both new-build developments and retrofit projects, the systems are modular and scalable, supporting a range of applications from boutique hotels to large

resorts and multi-site operations. Centralised monitoring and intelligent integration with building management systems allow real-time oversight and rapid response coordination, ensuring continuous protection without interrupting the guest experience.

### Expert Support and Seamless Delivery

ADI goes beyond technology by offering end-to-end support for hospitality professionals, facility managers, and installation partners. From system design and specification to installation guidance, commissioning, and long-term maintenance, ADI provides responsive, expert assistance at every stage of the project.

Comprehensive training and technical resources ensure that in-house teams and external contractors can work confidently with the systems in place. With ADI as a partner, hospitality businesses can deliver high-quality fire safety solutions that protect people, property, and brand reputation efficiently, reliably, and to the highest standards.

**Need support to configure or choose a solution?**

### Some Suggested Solutions

#### BF325-K1

#### C-Tec BF325/K1 AlertBuddy Deaf Person's Alert Kit

- Monitors and detects fire alarm signals
- Emits low frequency tone under 1 kHz
- Activates vibrating pillow pad for alerts

#### SC-44-0200-0001-99

#### SmartCell Intelligent Wireless Door Controller, White

- Fully wireless
- Quick and easy to install
- Fully addressable

**Explore Fire Panel Options**

## Alertex AirSafe Vape Sensor

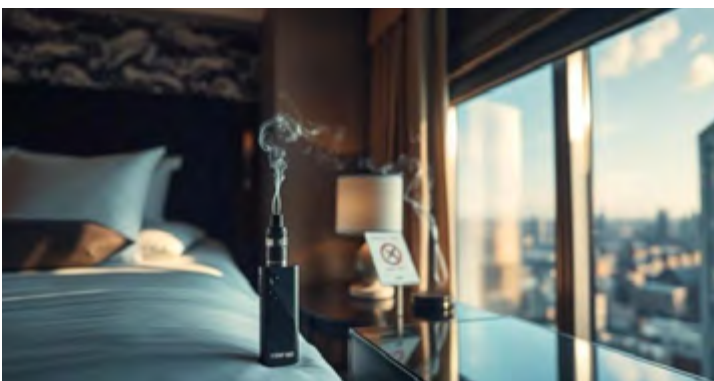

### ( Hotels Stay Smoke Free and Eco-Friendly )

Providing guests with a clean, safe, and comfortable stay is a top priority for every hotel. One growing challenge hotels face today is controlling vaping and smoking in rooms, corridors, and waiting areas - activities that can harm indoor air quality and damage the overall guest experience.

### Why Smoke and Vape Control Matters

- Sensitive guests, especially those with asthma or respiratory issues, may have symptoms triggered by vaping which can also travel through ventilation systems.
- Residue from vape aerosols leaves a sticky film on walls, furnishings and carpets and creates odours and discolouration of some surfaces. This can lead to an increase in cleaning and maintenance costs.
- Excessive vape clouds can scatter light inside optical smoke detectors causing false alarms and leading to disruptive building evacuations. In some cases properties can be fined for such false alarms.
- Vaping undermines a hotel's smoke-free policy and may lead to legal issues.
- Whilst vaping itself is not open-flame smoking, the lithium-ion batteries present in disposable vapes, of which there are still hundreds of thousands in circulation, can overheat and present a fire risk.

Maintaining a smoke-free environment is not only about comfort; it's also about protecting the image of the hotel, ensuring compliance with safety standards, and supporting a greener, healthier place to stay, ensuring guest satisfaction.

A clean, fresh atmosphere creates a positive impression and shows that the hotel values health and well-being. It also helps compliance with important safety and fire prevention standards, reducing the risk of damage or accidents caused by vaping. Moreover, a smoke and vape free policy supports environmental protection by improving air quality and minimising pollution. Altogether, it reflects the hotel's commitment to creating a safer, greener, and more responsible hospitality experience for everyone.

**NXICSB-BM**

**Master Internal Alert Call Point with Sounder and Beacon, Blue**

- Robust wireless alert solution with secure mesh protocol
- Battery operated, no wires or cabling required
- Portable and rapidly deployable units

**NXECP1-B**

**Nexus External Wireless Emergency Call-Point, Battery-Powered, Blue**

- Battery-powered wireless emergency call-point
- Integrates with Nexus Wireless Alert system
- Suitable for Fire Alert, Lockdown, and Exclusion Zoning

**NXECSB-B**

**Nexus External Emergency Call-Point with Sounder / Beacon, IP66, Blue**

- Robust wireless alert solution with secure mesh protocol
- Battery operated, no wires or cabling required
- Portable and rapidly deployable units

**NXFOB**

**EasySwitch One Button Key Fob, Black**

- Dual button fob for ALERTEX Wireless Alert system
- Activates ALERTEX system with 4-second button press | Prevents false activation with dual button design

**NXISB-B**

**Internal Sounder/Beacon, Blue**

- The Alertex sounder / beacon can play one of 32 different alert sounds upon activation and is paired with a visual flashing beacon.
- Also available as Master unit with reset key

**NXVS**

**Alertex Voice Annunciator with Strobe Light for Internal / External Use, Battery Powered, IP66**

- White flashing strobe lights with automatic activation and override option
- CD quality sound clarity with adjustable volume up to 100dBa

**NXVAPE**

**Alertex AirSafe Vape Sensor**

- Durable, vandal-resistant construction
- Precise detection of vapes and e-cigarettes
- Instant alerts via SMS or email
- Simple installation and unobtrusive design
- Comprehensive monitoring of air quality

**NXICSB-RM**

**Master Internal Alert Call Point with Sounder and Beacon, Red**

- Robust wireless alert solution with secure mesh protocol
- Battery operated, no wires or cabling required
- Portable and rapidly deployable units

**NXISB-R**

**Internal Sounder/Beacon, Red**

- Can play one of 32 different alert sounds upon activation and is paired with a visual flashing beacon.
- The volume of the sounder is adjustable up to 117 dB | Also available as Master unit with reset key

# The Advancement of Cloud-Based Video Surveillance Solutions for the Hospitality and Leisure Sector

Smarter security and better guest experiences with cloud video.

## Introduction

The hospitality and leisure sector is undergoing a significant digital transformation to enhance guest experiences, operational efficiency, and safety. The adoption of cloud-based video surveillance systems is at the forefront of this evolution. These advanced solutions redefine traditional security measures and provide scalable, cost-effective, and data-driven insights that align with the industry's unique demands.

Cloud-based video surveillance offers a paradigm shift from on-site systems, with features like remote access, AI-driven analytics, and seamless integration with other technologies. With growing safety concerns and evolving guest expectations, the need for robust and adaptable surveillance solutions has never been more urgent.

## Key Features of Cloud-Based Video Surveillance

### Remote Access and Monitoring

One of the most significant advantages of cloud-based surveillance is the ability to monitor properties in real time from any location.

### Scalability

Cloud solutions are inherently flexible, allowing properties to add new cameras or expand coverage without extensive infrastructure upgrades.

### AI and Analytics Integration

Advanced analytics capabilities, including facial recognition and behavioral analysis, empower businesses to address potential risks.

### Data Storage and Retrieval

Cloud storage eliminates the limitations of traditional physical storage systems, ensuring reliable data access and integrity.

### Cost Efficiency

Cloud-based solutions reduce upfront hardware investment and ongoing maintenance costs, making it a cost-effective choice.

## Benefits for the Hospitality and Leisure Sector

### Enhanced Guest Experience

Security plays a pivotal role in fostering trust and satisfaction among guests. [Cloud-based surveillance solutions](#) ensure a safer environment by enabling real-time monitoring and swift incident response. With advanced features such as facial recognition and crowd analytics; systems supplied by ADI can proactively identify and address security

concerns that prioritise guest safety and comfort.

### Operational Efficiency

ADI's [surveillance systems](#) extend beyond traditional security functions by offering valuable insights into operational dynamics. For instance, advanced [video analytics software](#) can generate heat maps to help optimise foot traffic in hotel lobbies or leisure facilities. This data-driven approach improves space utilisation and staff allocation, ensuring smooth operations and better resource management.

### Compliance and Liability Management

In an industry where compliance with safety and privacy regulations is paramount, ADI ensures that cloud-based surveillance solutions meet stringent requirements such as GDPR and other regional standards. Systems include secure data storage, encryption, and access controls to protect guest privacy. Additionally, high-quality video evidence from solutions provided by ADI can assist in resolving disputes, mitigating liability risks, and maintaining regulatory compliance.

**Seamless Integration**

ADI supplies a range of modern cloud-based systems which integrate effortlessly with IoT devices, [access control systems](#), and other technologies. For example, ADI's solutions can synchronise with [smart locks](#), enabling secure room access for guests and connecting to building management systems for comprehensive operational oversight. This integration creates a unified safety and operational ecosystem, streamlining processes and enhancing overall efficiency in hospitality environments.

Cloud Storage

**Addressing Sector-Specific Challenges**

**Privacy concerns**

The hospitality sector faces unique challenges in balancing surveillance needs with guest privacy. Cloud systems address these concerns through advanced encryption, secure access controls, and anonymisation features, ensuring compliance with stringent data protection regulations like GDPR.

**Managing Large-Scale Operations**

Managing surveillance across various locations can be daunting for sprawling resorts or multi-property hotel chains. Cloud-based systems simplify this by centralising monitoring and management, allowing operators to oversee all properties from a single dashboard.

**Emergency Response**

Cloud systems enhance emergency preparedness by enabling real-time alerts and remote coordination. In fire evacuations or security breaches, these systems can provide critical data and facilitate communication with staff and emergency services, ensuring swift and effective responses.

**Future Trends in Cloud-Based Video Surveillance**

**Advances in AI**

Artificial intelligence is revolutionising cloud surveillance by enabling predictive analytics and automated responses. Future systems may detect potential threats, such as unattended luggage or escalating conflicts, and alert security teams before incidents occur.

**5G Connectivity**

The rollout of 5G networks is set to accelerate the adoption of cloud-based surveillance. With faster data transmission and lower latency, businesses can access real-time video feeds and analytics with unprecedented speed and reliability.

**Integration with Smart Environments**

As the hospitality sector adopts smart building technologies, cloud-based surveillance will play a crucial role in creating cohesive ecosystems. Cameras integrated with energy management systems can adjust lighting and temperature based on occupancy, enhancing guest comfort while reducing operational costs.

**Cybersecurity Innovations**

With the increasing reliance on cloud systems, cybersecurity remains a top priority. Providers like ADI invest in advanced encryption protocols, multi-factor authentication, and regular system audits to safeguard against evolving cyber threats.

**Implementing Cloud-Based Surveillance: A Guide for Decision-Makers**

**Assessment**

Before adopting a cloud-based surveillance system, businesses should evaluate their specific needs, property size, and budget.

Key considerations include the number of cameras required, desired features like analytics, and integration with existing technologies.

**Choosing the Right Provider**

Selecting a reputable provider is critical to ensuring system reliability and support. ADI offers tailored solutions for the hospitality sector, combining cutting-edge technology with expert consultation to address unique challenges.

**Implementation Best Practices**

To ensure seamless deployment, businesses should prioritise staff training, regular maintenance, and clear communication about system capabilities. Collaboration with experienced providers like ADI can streamline the process and minimise disruptions.

**Measuring Success**

Key performance indicators (KPIs) such as incident resolution time, guest satisfaction scores, and cost savings can help evaluate the surveillance system's effectiveness. Regular reviews ensure the system continues to meet evolving business needs.

**Conclusion**

Cloud-based video surveillance represents a transformative step for the hospitality and leisure sector, offering unmatched scalability, efficiency, and security. With features like remote monitoring, AI-driven analytics, and seamless integration, these systems address the industry's unique challenges while enhancing guest experiences and operational efficiency.

**As a leader in security solutions, ADI provides tailored systems that empower hospitality businesses to stay competitive and secure. By embracing these advancements, the industry can look forward to a future where safety and innovation go hand in hand.**

# LED Technology for Every Environment

**43-GOB3X3-FHD1.5**

**VHW-HW**

**HIGHWIRE High-Speed Ethernet Over Coax Video Cable Module**

- Simple retro-fit of IP cameras in place of analogue
- Full 100Base-TX Ethernet performance
- Supports multiple IP cameras (with switch)

**VHW-HWPS-B**

**HIGHWIRE Powerstar Ethernet & PoE Over Coax Converter**

- Base Unit
- SAFEVIEW instantly checks connection power status
- Full 100Base-TX Ethernet performance
- Re-use existing coax cable for IP cameras

**VHW-HWPS-C**

**HIGHWIRE Powerstar Ethernet & PoE Over Coax Converter**

- Camera Unit
- Eliminate power cabling with Power over Ethernet over coax
- Fully automatic - no configuration required
- Simple fast, cost-effective installation

**VLS-1P-B**

**LONGSPAN BASE Long Distance, Point to Point, 10/100 Ethernet & PoE Extender**

- Unrestricted 100Base-T with PoE over 800m (PoE models)

**VLS-1P-C**

**LONGSPAN CAMERA Long Distance, Point to Point, 10/100 Ethernet & PoE+ Extender**

- Unrestricted 100Base-T with PoE over 800m (PoE models)

**VTN-TN-PRO**

**TIMENET Pro Master NTP Timer Server**

- Accurate universal atomic clock reference
- TIMENET Pro Supports all NTP compatible devices
- Ideal for CCTV and DVR applications

**VOR-ORM-G**

**Outreach Max G Gigabit Ethernet and PoE Extender**

- Instantly doubles gigabit cable range to 200m s
- Full gigabit Ethernet
- Extends POE and POE Plus up to 90W

**VOR-ORL-G**

**Outreach Lite G Gigabit Ethernet Extender**

- Instantly doubles gigabit network range to 200m s
- No local power required
- Full unrestricted gigabit network bandwidth

**VSPAN-PLUS-6-UK**

**VIEWSPAN 6 Plus 6-Channel Video Wall Controller, 2U**

- 6-Display outputs for Full HD or UHD monitors
- Decoding and display of 9 FHD streams per screen output

# Sound Like You've Never Heard it Before

## Powerful Audio for Any Project

Episode® products are designed to deliver premium audio to real-world applications and are crafted from quality materials that guarantee power, performance, and reliability.

**Episode Core Series**  
Your go to speaker line  
for commercial audio

**Signature by Episode**  
Versatility that speaks  
volume

**Episode Radiance**  
All-in-one outdoor  
audio and lighting

**ES-ROCK-6-GRA**  
**Rock Series Speaker**

- All-weather to withstand harsh environments
- Available in granite or sandstone finish
- Perfect for outdoor audio setups

**ES-HT-IRSAT-4-WAL**  
**Home Theater In-Room Speaker**

- 4" In-Room Satellite Speaker
- Walnut finish for elegant aesthetics
- Supports Dolby Atmos for immersive sound

**ES-RAD-SPKBLNK3BLK**  
**Outdoor Bollard Speaker**

- Sleek thin bezel for a minimalistic finish
- Installer-friendly magnetic design
- Easy one-step painting for customisation

**ES-CORE56-IC-POINT**  
**CORE 5 Series In-Ceiling Point Speaker**

- Tune the speaker to the room with the easily accessible tweeter switch
- Bezel-Less Grille that provides a smooth, clean finish when installed
- Teteron Dome Tweeter - sound clarity

**EA-MINI-5-1D-200**  
**Mini AV Receiver**

- 200W power for robust sound
- Compact design fits behind TV's
- Ideal for small spaces

**ES-HTR-IWLCR-L-6**

- Acoustically matched for immersive audio experience | Rigid MDF Cabinets reduce vibration and SPL loss
- Enhance efficiency and response with 3-Way Design

**ES-HTR-IRTWR-6-BLK**  
**Home Theatre In-Room Tower Speaker**

- Available in Gloss Black, White, or Walnut
- Linkwitz-Riley Filters for better efficiency
- Referene level audio with premium components

**EA-DYN-16D-100**  
**16-Channel Class-D Amplifier**

- Premium components for exceptional audio performance
- Audio sensing for power-saving standby
- Bridgable outputs for high-power applications

**ES-LS-SAT-4-BRN**  
**Landscape Series 4" Satellite Speaker**

- Blends into outdoor environments
- Full, natural sound with clear highs
- Flexible mounting options

# SAY GOODBYE TO SERVICE CALLS

## The reboot has been reimagined.

Pair WattBox power products with OvrC, the industry's #1 remote management platform, and extend device servicing from anywhere. Whatever the time of day (or night), WattBox power products automatically keep status of your devices so that if one goes unresponsive, it will reboot it automatically. It can also be programmed to power-cycle at a specific time each week, saving you time and money.

Professional-Grade Power

Remote Troubleshooting

Self-Healing Auto Reboot

**WB-250I-IPW-2**

**250I Series Wi-Fi Power Controller**

- Suitable for installations including digital signage and AV racks
- Wi-Fi and Wired connectivity for flexible installation
- Supports OvrC integration, leading remote management platform

**WB-800I-IPVM-6**

**800I-Series IP Power Strip and Conditioner**

- 6 Individually Controlled & Metered Outlets
- Compact & Versatile Design with Flexible Mounting Options
- Supports OvrC integration, leading remote management platform

**WB-800IVPS-IPVM-12**

**800I-Series IP Vertical IP Controlled Power Strip and Conditioner**

- 12 Individually Controlled & Metered Outlets
- Robust surge protection, protection during unsafe voltage conditions
- Supports OvrC integration, leading remote management platform

**WB-800ICH1U-IPVM-8**

**800I-Series Integrated Faceplate IP Power Conditioner**

- 8 Individually Controlled & Metered Outlets
- Fits into small racks, media cabinets or tight spaces
- Integrated faceplate with LED indicators

**WB-800I-FP**

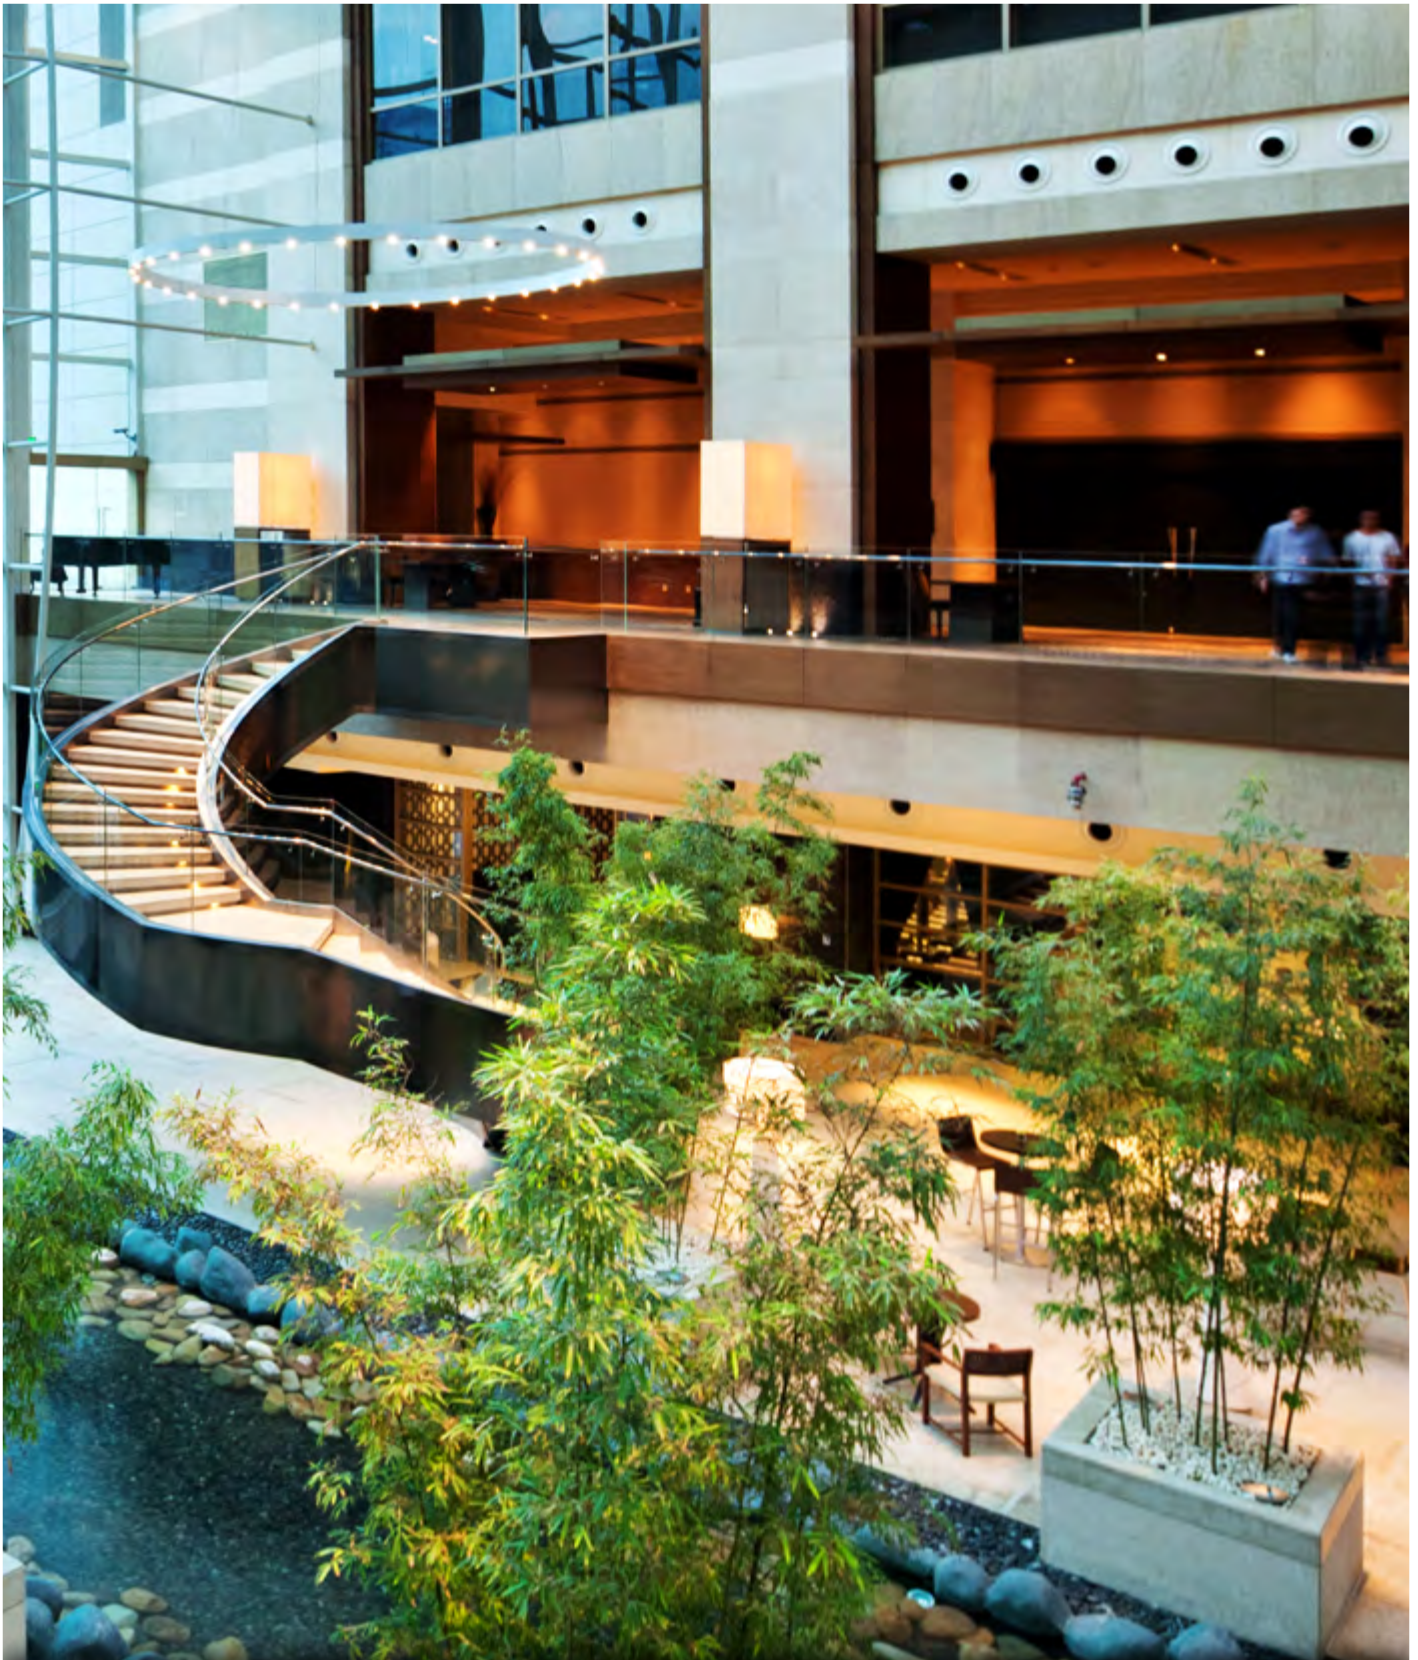

**800I-Series Rack Mountable Faceplate Display**

- Comprehensive Monitoring: LED display for voltage and readings
- Status Indicators: surge, grounding, internet connectivity
- Control Options: Local reset, connected PDUs and AC power

**Operationally Essential Cloud Management**

- Real time notifications
- Remote reboots
- Firmware updates
- Remote access
- Client facing mobile app
